ABOUT SING TAO

關於星島

Sing Tao News Corporation Limited is a media corporation with a vision to become a leading cross-media content and service provider serving global Chinese communities. The Company is listed on the Main Board of the Hong Kong Stock Exchange (stock code: 1105). Its principal activities comprise Media and Media-related operations, including traditional media spanning Newspapers, Magazines, Recruitment Media and Books, as well as online and mobile multi-media platforms which the Group has been developing in order to open up new reader segments and revenue sources. In building our cross-media business we keep a pulse closely on the latest development trends to meet the extensive needs of the market. Based in Hong Kong, the Group's business network covers major cities in the PRC, the US, Canada and Europe, with around 1,100 staff worldwide.

The "Sing Tao" brand dates back to 1938 when the daily newspaper of the same title was launched in Hong Kong. It marks 85th anniversary in 2023. Over the years, "Sing Tao" has become recognised as a global name in the print media market. The current newspaper portfolio includes paid and free newspapers in both Chinese and English languages, targeting local and overseas Chinese readers. Currently, the Group is placing strong efforts on the development of its new media business by adopting the strategy of upgrading the "single-engine drive" of the Group's traditional media to become a "dual-engine drive" which combines traditional media and new media, in order to build a competitive multi-media platform. In January 2022, the Group launched the all-new "Sing Tao Headline" app, providing users with trending news, videos/live broadcasts, personalised functions and practical daily-living tools.

A growing coalition of countries, cities, businesses and other institutions are pledging to achieve carbon neutral or net-zero emissions to keep us on track for a global temperature rise of less than 1.5 °C compared with pre-industrial levels in combating climate change. Recognising that the attention paid to the sustainability issues has become increasingly critical for corporates across all industries, the Group believes that the integration of sustainability into its corporate strategy can help address and manage the ESG challenges faced and provide courses of action in responding to them.

Our Board of Directors take the overall responsibility for leading the Group to integrate sustainability into its decision-making and business planning processes, and evaluating and mitigating its ESG-related risks by ensuring that effective risk management and internal control systems are in place.

Paper and ink

Due to the Group's business nature, large amounts of paper and ink are consumed in the production. We encourage the use of environmentally friendly products such as paper from Forest Stewardship Council to minimise the impacts on forests. Newspapers are collected for recycling and remanufacturing for printing. All ink used was supplied by manufacturers who comply with ISO14000 and ISO14001 Environmental Management System Standards as well as the ISO9000 and ISO9001 Quality Management System Standards. Organic-based printing ink is also employed for our products.

Looking ahead, the Group will continue to review its impacts on the environment and natural resources, and to perform comprehensive management where appropriate.

Climate Change

Climate change is recognised as one of the most impactful environmental crises in the world and a motivation factor for other environmental issues. Among all those driving factors, human activities have contributed substantially to climate change, and all communities and businesses will continue to be affected by the impacts of climate change. The Group acknowledges that collective action is vital to tackle this alarming global issue. We believe identifying and managing climate-related risks and opportunities will help us build resilience to climate change and contribute to a sustainable low-carbon economy.

We have established the Climate Change Policy to outline our commitment and approach, and strive to take adequate steps to build our resilience to climate change. The Group attaches great importance to the major environmental, legal and market changes caused by climate change. Moving ahead, the Group will review and enhance its approach to identify, prepare for and respond to climate-related risks and opportunities that are relevant and material.
